

Advantages of customized water purifier

Water purification methods based on the quality of raw water.

water purifier has an advanced, Micro controller based PCB ensures 100% purity.

water purifier uses World's best purification methods like UV, OZONE, RO etc.,

water purifier has an advanced preventive maintenance information display.

water purifiers are heavily built, using stainless steel housings, MS powder coated frames

water purifier has an option to provide warm, cold and hot purified water outlets.

Uses the world's most superior water purification technologies - Ultraviolet (UV) & Ozone.

Uses two of the best quality and branded purifiers in our system – UV purifier by Alfa and Ozone purifier by Faraday.

Uses Microprocessor controlled Electronic system to ensure the precise operations of our Purifiers and Dispensers.

Automatic "Reprocessing and Residual ozone" ensures the purity of water always and protects the inbuilt storage tank water.

Ozone contact time can be varied according to the raw water parameters.

100% Automatic operations and Customizable.

Dispenses purified normal, hot and cold water in a single compact unit.

LED indication systems indicate the operations precisely.

Food graded water tubes, tanks and components.

Superior grade Stainless Steel SS304 body, 0.8mm thickness and 2mm thickness Strong Stainless Steel Legs.

Double protection [Thermostat and thermal cut-off] for compressors and heaters to ensure Safety.

Exclusively designed for Aesthetic appearance and long lasting.

Versatility system to match any type of water Inlets like online or additional tank provision and also can be connected with existing external purifiers with automation.

Bottled water dispensing possible with options for 1 or 2 or 4 bottles and our funnels are made of SS304 material and these unique options are available only with Conway.

Wide Range of models suitable for any sectors like Residential, Hospitals, institutions, industries, Offices, etc.

Service – friendly design to make the maintenance ease and comfortable.

Electronic automatic cut-off system provides reduced power consumption and thereby results in energy saving.

Using a best in class Compressors made by Emerson and Tecumseh.

Eco friendly and CFC – free cooling systems.

Complete equipments are serviceable for minimum 20 years.

Easy to install and maintain.

New: Contactless options available with IR Sensor or Pedal Switches for selected Models.
